- 
- 

## Tips To Get The Most Out Of This Call

1. Print this Action Guide
2. Use these tips to develop your blog.
3. Take action NOW –

Quote of the Call: “If you chase two rabbits, you will not catch either one.” ~ Russian Proverb

**Today You will Learn And Discover The Newest Plugin Recommendations - and some I no longer recommend**

**WP-DB-Backup**

**WP-Sticky**

**Tiny MCE Advanced Editor**

**Share This**

**Democracy Poll**

**Vipers Video QuickTags**

**What's Up With PodPress??**

## **WP-DB-Backup**

<http://www.wordpress.org/extend/plugins/wp-db-backup/>

What this plugin does and does not do.

## **WP-Sticky**

<http://wordpress.org/extend/plugins/wp-sticky/>

### **Two types – Sticky and Announcement**

#### **The difference is important**

When you login and write/manage a post you'll see "Post Sticky Status" down in the lower right hand corner. There are three options "Announcement", "Sticky", and "None". Announcement makes a post always on top no matter what. Sticky keeps it at the top of that day's posts. So, say you made 4 posts on Wednesday and made one sticky, the sticky one would stay on top of Wednesday's posts. If you then make a post on Thursday it will appear on top of all of Wednesday's posts but underneath the Announcement post.

## **Tiny MCE Advanced Editor**

<http://wordpress.org/extend/plugins/tinymce-advanced/>

## TinyMCE Buttons Arrangement

Drag and drop buttons onto the toolbars below.

2.

## **Share This**

<http://wordpress.org/extend/plugins/share-this/>

The ShareThis WordPress plugin provides a quick, simple to use, and unobtrusive way for users to add your post to many social bookmarking sites, or to send your post link via email, AIM, Facebook, MySpace and more.

## **Democracy Poll**

<http://wordpress.org/extend/plugins/democracy/>

This poll plugin is easy to use, install, and manage. It uses AJAX to load data, making it quick and fun to use. Add {democracy:\*id\*} to your posts to include polls in your posts, where \*id\* corresponds to the ID of your poll.

## Vipers Video QuickTags

<http://wordpress.org/extend/plugins/vipers-video-quicktags/>

Tired of copying and pasting the embed HTML from sites like YouTube? Then this plugin is for you.

Just simply click one of the [new buttons](#) that this plugin adds to the write screen (rich editor included) and then paste the URL that the video is located at into the prompt box -- easy as that. You can fully configure how the videos are displayed (width, height, colors, alignment on the page) and much more. Your site will even stay (X)HTML valid unlike with the code provided by most video sites.

Currently supports these video sites:

- [YouTube](#) (including playlists)
- [Google Video](#)
- [DailyMotion](#)
- [Vimeo](#)
- [Veoh](#)
- [Viddler](#)
- [Metacafe](#)
- [Blip.tv](#)
- [Flickr](#) videos
- [Spike.com/IFILM](#)
- [MySpaceTV](#)

As well as these file types:

Flash Video Files (FLV)

QuickTime (MOV, etc.)

Generic video files (AVI, MPEG, WMV, etc.)

### **What's Up With PodPress??**

**I don't know!! They aren't updating it to work with WordPress 2.5 or higher.**

**My solution - [Audio Acrobat](#)**
